OST Anti-Spam/Antivirus

OST currently subscribes to an anti-spam/antivirus Email pre-filter from Comodo. Comodo's AntiSpam Gateway service pre-filters all inbound email originating from outside of the OST Network. Once per day you may receive a notification email from their system. The email will come in as admin@antispamgateway.Comodo.com and will contain any email their filters flag as spam. If you wish one of the listed emails released, just click on the email, login to their site and request release of the email item. If you do not receive an email you are expecting check Comodo first before getting it resent or reporting problems with email services. If you do not know or lost your login information to Comodo send an email to ITSupport@ost.edu.

You can also use the link below to login to Comodo.
